

Download Algae Based Polymers, Blends, And Composites (Enhanced Edition)

Polymers, an international, peer-reviewed Open Access journal. Wood is the main source of lignin in the world. This generic term “Lignin” describes a large group of aromatic biopolymers, i.e. the second most abundant class of biopolymers on Earth. The developments and applications of PDMS-type coatings have been critically reviewed. • Comprehensive literature survey has been undertaken for polydimethylsiloxanes with protective potentials.
