Chemical elements (below are listed alterations of plasma concentrations; see also alterations of urinary concentrations).
ABSTRACT. Several minerals are required for life to exist. In animals, 7 elements (Ca, P, Mg, Na, K, Cl, and S) are required to be present in the diet in fairly large amounts (grams to tens of grams each day for the dairy cow) and are termed macrominerals. - Effects Of Dietary Zeolite On Serum Contents And Feeding Performance In Rats (Report)
