Conscience is a cognitive process that elicits emotion and rational associations based on an individual's moral philosophy or value system. Conscience stands in contrast to elicited emotion or thought due to associations based on immediate sensory perceptions and reflexive responses, as in sympathetic central nervous system responses. CHILDREN DURING THE HOLOCAUST. The innocent world of Jewish children living in Germany changed when the Nazis came to power in 1933. The Jews were a special target of Nazi ideology and policies, which ultimately resulted in the Holocaust. The Holocaust, also known as the Shoah, was a genocide during World War II in which Nazi Germany, aided by local collaborators, systematically murdered some six million European Jews—around two-thirds of the Jewish population of Europe—between 1941 and 1945. \$25,000 MATCHING GIFT CHALLENGE Join our #GivingTuesday challenge to make your tax-deductible gift go twice as far.
