The Annual Review of Phytopathology, in publication since 1963, covers the significant developments in the field of plant pathology, including plant disease diagnosis, pathogens, host-pathogen Interactions, epidemiology and ecology, breeding for resistance and plant disease management, and includes a special section on the development of concepts. The Annual Review of Sociology, in publication since 1975, covers the significant developments in the field of sociology. Topics covered in the journal include major theoretical and methodological developments as well as current research in the major subfields. Human ecology is the discipline that inquires into the patterns and process of interaction of humans with their environments. Human values, wealth, life-styles, resource use, and waste, etc. must affect and be affected by the physical and biotic environments along urban-rural gradients. Ecology; Ecology addresses the full scale of life, from tiny bacteria to processes that span the entire planet. Ecologists study many diverse and complex relations among species, such as predation and pollination. The diversity of life is organized into different habitats, from terrestrial (middle) to aquatic ecosystems. - Annual Review Of Ecology And Systematics: 2001 (annual Review Of Ecology And Systematics, 32)
