

Download Evidence Based Practice In Athletic Training

Evidence-Based Practice in Athletic Training Web Courses. This course was developed by a team of individuals with content knowledge in evidence-based practice, supported by the Old Dominion University Research Foundation, and funded through the NATA. The purpose of these online modules is to provide athletic trainers with a structured resource...Evidence-based practice provides athletic trainers with the tools for locating evidence and for evaluating the quality of that evidence, so that they can benefit from the work of other health care professionals. New or updated evaluations and treatments for a more effective return to play are being published in literature more and more frequently. Evidence-Based Practice in Athletic Training provides essential information on the fundamentals of evidence-based practice (EBP) for students who are working toward certification in athletic training and for athletic trainers who wish to stay up to date on best practices in the field. For students who want a thorough skill base in EBP and for credentialed health care professionals who seek further knowledge in the area, Evidence-Based Practice in Athletic Training will help all current and future athletic trainers provide the best care for their athletes and clients. - Evidence Based Practice In Athletic Training
